

**JOURNAL OF BIOLOGICAL  
ENGINEERING**

**[www.jbioleng.org](http://www.jbioleng.org)**

**Editor-in-Chief:** Mark Eiteman (United States)

***Journal of Biological Engineering*, the official journal of the Institute of Biological Engineering, considers articles on all aspects of biological engineering.**

Biological engineering is an emerging discipline that encompasses engineering theory and practice connected to and derived from the science of biology. Topical areas include, but are not limited to: synthetic biology and cellular design; engineering of biomolecular and cellular devices; bioproduction and bioproduct engineering; ecological and environmental engineering; biological engineering education and the biodesign process

*Journal of Biological Engineering* aims to provide a home for the continuum from biological information science, molecules and cells, product formation, wastes and remediation, and educational advances in curriculum content and pedagogy at the undergraduate and graduate-levels.

The journal considers the following article types: research articles, book reviews, letters to the editor, meeting reports, methodology articles and reviews. For further details, see [www.jbioleng.org/info/about/](http://www.jbioleng.org/info/about/).

### **Reasons for publishing in *Journal of Biological Engineering*:**

- All articles published in the journal are open access; universally accessible online without charge.
- High visibility for your work - anyone with Internet access can read your article, free of charge.
- Included in PubMed - making your work easy to find, read and cite.
- Articles are published immediately upon acceptance.
- Authors retain the copyright of their articles.
- Electronic submission and peer-review makes the whole process of publishing your article simple and efficient.
- Publishing online means unlimited space for figures, extensive datasets and video footage.
- Professional formatting meets the standards expected by researchers.
